

2010 GSS

On October 1st, 2008, 37 proposals were submitted to the project for modules on the 2010 GSS. On October 31st and November 1st, 2008, they were reviewed by the PIs and GSS Board of Overseers and 10 proposals were selected for further development. Depending on the level of funding supplied by the National Science Foundation and further developmental and pretesting of the modules some or all of these modules will become part of the 2010 GSS. Cognitive pretesting and other developmental work will be carried out between November, 2008 and March, 2009. Then at the April Board meeting the PIs and GSS Overseers will evaluate each of the modules. Those approved will appear on the full GSS field test in June and July, 2009. The Board and PIs will then decide on the final content of the 2010 GSS at the September, 2009 Board meeting.
